

Binomial Expansion

Definitions

The factorial $n! \equiv n \times (n-1) \times (n-2) \times \cdots \times 3 \times 2 \times 1$.

The falling factorial $n^{\underline{k}} \equiv n \times (n-1) \times (n-2) \times \cdots \times (n-(k-2)) \times (n-(k-1))$. It has k terms.

$$0! = n^{\underline{0}} = 1$$

$$\text{The choose function } {}^nC_r \equiv \binom{n}{r} \equiv \frac{n!}{r!(n-r)!}$$

Expansions

For a natural number n , the expansion of $(a+b)^n$ is

$$a^n + na^{n-1}b + \binom{n}{2}a^{n-2}b^2 + \cdots + \binom{n}{r}a^{n-r}b^r + \cdots + b^n$$

$$\text{In general, } (a+b)^n = \sum_{r=0}^n \binom{n}{r} a^{n-r} b^r \quad (n \in \mathbb{N})$$

That's true if n is a natural number, but there is a version that works for all real numbers. For an expression $(a+bx)^n$, it should first be normalised to $a^n(1+\frac{b}{a}x)^n$. Let $y = \frac{b}{a}x$. Then the expansion of $(1+y)^n$ is given by

$$1 + ny + \frac{n(n-1)}{2!}y^2 + \frac{n(n-1)(n-2)}{3!}y^3 + \cdots + \frac{n(n-1)(n-2)\cdots(n-(r-1))}{r!}y^r + \cdots$$

$$\text{In general, } (a+bx)^n = a^n \sum_{r=0}^{\infty} \frac{n^{\underline{r}}}{r!} \left(\frac{b}{a}x\right)^r \quad (n \in \mathbb{R})$$

Calculus

Elementary Derivatives

| | | | | | | |
|------|-----|------------|----------|-----------|-------------|---------------|
| f | C | x^n | $\sin x$ | $\cos x$ | a^x | $\ln x$ |
| f' | 0 | nx^{n-1} | $\cos x$ | $-\sin x$ | $a^x \ln a$ | $\frac{1}{x}$ |

Composition Laws

Let f and g be differentiable functions over x .

The $'$ mark denotes the derivative with respect to x , so $f' = \frac{df}{dx}$ and $g' = \frac{dg}{dx}$.

The \circ symbol denotes function composition, so $(f \circ g)(x) = f(g(x))$.

$$(f \pm g)' = f' \pm g'$$

$$(fg)' = fg' + f'g$$

$$(f \circ g)' = (f' \circ g)g'$$

$$\left(\frac{f}{g}\right)' = \frac{f'g - fg'}{g^2}$$

Integral Tricks

For integrals of the form on the left, consider the function on the right.

| | |
|-----------------------------|-----------|
| $\int k f' f^n \, dx$ | f^{n+1} |
| $\int k \frac{f'}{f} \, dx$ | $\ln f $ |
